

Firmware Change History for TM-J7200 and TM-J7700

| Version | Detail | |
|---------------|--------------------|--|
| 10.00 ESC/POS | Added new function | New Release |
| 10.01 ESC/POS | Fixed bug | Fixed an issue that occurred under the environment that meets all the following conditions: - Using the Ethernet interface - Enabling DHCP - Using a determined IP address for print setup - The printer is offline (such as the cover is open). |
| | Fixed bug | Fixed an issue that the warning "Net::ERR_CERT_COMMON_NAME_INVALID" is displayed when accessing WebConfig in Chrome 58 or later. |
| 10.02 ESC/POS | Fixed bug | Fixed an issue that the function for specific use became effective in the following operations: (1) Automatic printing of IP address at startup (2) Status sheet printing of Ethernet |
| 10.03 ESC/POS | Fixed bug | Fixed the printing issue that occurred on the second and subsequent sheets: the last line is printed 7 mm higher position than where it is supposed to be. |
